
Small hexacopter flight: 11 stops covering all six motors in 76 s of flight
Height above the arming point (EKF, barometer)
geofence 1.50 m
ceiling 1.25 m
Height [m]
the baro estimate drops below 0 at landing
Tilt: commanded by the pilot and measured
Tilt [°]
measured
commanded (setpoint)
Which motor is stopped, and when
M1 right
M2 left
M3 front-left
M4 rear-right
M5 front-right
M6 rear-left
stopped
gradual restore
switch ignored (another motor was stopped)
Time since arming [s]
